

divesites

Divesites 1-10 & 24 are regularly visited by boat.
 Divesites 11-16 & 18-23 are full daily trips including 2 dives and catering on board served by our staff.
 Divesites 17 & 25 are reachable upon request via car. All trips depend by weather coditions.

divesites

1. Sassi Neri

rocks covered by coralligenous between -10 m and -18 m, it descends down to -35 m where you'll find big rocks populated by groupers and sometimes sunfish

2. Puntanera / Airplane wreck

ideal for beginners and photographers, at -14 m you'll find an airplane wreck covered with sponges; well protected bay, suitable also for wavy days

3. Capo Calvo

the area drops progressively to great depth, red gorgonias can be found from -25 / -30 m; lots of barracuda schools

4. Picchi di Pablo

vertical wall that drops to -38 m, with many openings and fissures in the rocks

5. Punta Galera

shoal starting from -25 m up to -6 m, rich in fish and soft coral also at shallow depth

6. Grottoni

rocky structures that drop to -40 m, along the shore there are many passages and swimtroughs

7. Ripalti

cape that extends from -5 m to -25 m, where you'll find a big rock descending down to -35 m

8. Remaiolo

small island that offers walls, red gorgonias and many schools of fish

9. Gemini

shoal almost getting to the surface, many swimtroughs and overhead passages with a max depth of about -25 m

10. Corbelli

rocks that grow up to 3 / 4 meters above the surface, creating an underwater 'labyrinth' with max depth -20 m

11. Punta Morcone

small wall from -12 m to -35 m

12. Scoglio che bara

group of rocks with walls covered with parazoanthus

13. Capo Stella

small rocky island dropping down to -40 m, rich in red gorgonia

14. Capo Fonza

marvellous wall covered with red coral from -30 m, with small caves and narrow passages

15. Secca di Fonza

shoal with a nice wall

16. Scoglio della Triglia

small rocky island, from -20 m drops to the depth; at -17 m you will find a statue of the holy Virgin

17. Pomonte Wreck

fascinating shipwreck; easily accessible from the shore, where you can leave your car

18. Palmaiola

island with a lighthouse, typically hit by strong currents and therefore visited by many stingrays

19. Cerboli

small island with tiny caves and passages

20. Secca di Capo Vita

shoal with swimtroughs and small caves, max depth -15 m

21. Scoglietto di Portoferraio

marine protected area since 1971; this lighthouse isle is populated by groupers and big schools of fish

22. Secca di Santa Lucia

rocky shoal covered with coralligenous from -12 m to -25 m

23. Enfolia

small island very close to the shore

24. Cannelle

two shoals at -10 m dropping to -40 m, thriving with red gorgonias from -28 m

25. San Andrea

the sea bottom drops progressively up to a small wall covered with coralligenous and parazoanthos; the divesite is easily accessible by car
